DETAILED ACTION

1. Claims 1-4, 6-11, 12-16, 18-22 and 24-28 are presented for examination. Claims 1-4, 7-10, 12-16, 18-22 are amended. Claims 25-28 are newly added. Claims 5, 11, 17 and 23 are canceled. This office action is in response to the applicant's amendments, filed on July 21, 2005.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Paterson (Reg. No. 31,287) on September 27, 2005.

The application has been amended as follows:

In claim 1, after line 2, insert -- "a processor;" --.

In claim 13, line 1, delete [a method], and insert -- "a computer-implemented method" --.

In claim 14, line, delete [The method as set forth in Claim 13], and insert -- "The computer-implemented method as set forth in Claim 13" --.

In claim 15, line, delete [The method as set forth in Claim 14], and insert - - "The computer-implemented method as set forth in Claim 14" - -.

In claim 16, line, delete [The method as set forth in Claim 14], and insert - - "The computer-implemented method as set forth in Claim 14" - -.

In claim 18, line, delete [The method as set forth in Claim 13], and insert - - "The computer-implemented method as set forth in Claim 13" - -.

In claim 27, line, delete [The method as set forth in Claim 13], and insert - - "The computer-implemented method as set forth in Claim 13" - -.

Allowable Subject Matter

3. Claims 1-4, 6-11, 12-16, 18-22 and 24-28 are allowed.

Reason For Indicating Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 7, 13 and 19 identify distinct feature, the computer-implemented method, system and computer-executable instructions for automatically classifying. The closest prior arts, Shastri et al (U.S. Patent No. 6,845,485) disclose, keyframe classifier for segmenting the video signals into an initial set of one or more story segments, text classifier controller for providing multiple classifications of text, the text classifier controller reading text having a plurality of keywords contained within at least one of the

story segments, identifying one or more keywords within each of two or more lines of the text. The prior arts do not address the computer-implemented method, system and computer-executable instructions for identifying at least one of the keywords, classifying each of the line of text as apart of one or more classifications of the video signals that have been segmented into the at least one story segment, and in response to a comparison of the identified keywords, identifying a keyword transition point within the at least one story segment between two adjacent portions of texts wherein a number of keywords detected in a keyword category for at least one line of text prior to the keyword transition point either decreases below a first threshold number or increases above a second threshold number. Shastri fails to suggest the claimed limitation as mentioned above in combination with other limitations of the dependent and independent claims. The claims 1-4, 6-10, 12-16, 18-22 and 24-28 are hereby allowed.
